

A Better Life Homecare is one of my first sites for a business that is launching soon in the Palm Bay area. My clients logo color is blue so we incorporated the blue throughout the site. However, my client also really likes purple and may want to change her logo and branding one day. I used purple for larger fonts. I used jQuery effects to fade dots on my interactive map. My map consumed a lot of my time because I know my client wanted to see that feature and eventually add more content for her caretakers. I added an Interactive map that displays the county of Brevard, Florida and some attractions. My image gallery is responsive and does scale larger when hovered. I used the canvas tag for some of my images on my carousel. The graphics belong to my client.
